

Dazzling high gloss finish,
with unbeatable protection
against rust...
just in case it rains.

auto-balm: ENGINEERED FOR THE GREAT BRITISH SUMMER

Auto-balm is a superb award-winning car polish – it confers an unparalleled, truly deep wet-look shine to automotive paint finishes including, cellulose, two-pack, synthetics, clear coat and water based.

Atomic umbrella

This summer treat your vehicle to a high-shine finish that will transform not only its appearance, but also provide real protection. Unlike any other wax or polish Auto-balm contains extraordinary corrosion inhibitors that lock together to form what can be considered as an atomic umbrella which prevents moisture from penetrating capillary pores in the paint film and stops rust from forming on bare steel surfaces exposed at stone chip sites. It really does work as the laboratory photographs show. So while you simply “wax” your car in the normal way you’re also making it rust proof – two jobs, beautiful results in one easy step.

Shine not wear

Many widely-used car polishes produce large quantities of white dust upon buffing, not only

Test Panels - after 24 hours in hot salt spray cabinet

Middle column: Auto-balm 1-6 All main competitors, inc. £400 ‘manufacturer treatment’.

does this dust become stuck in swages, seams and body features where it’s difficult to remove, it’s also a sure indication that the polish contains abrasive. These abrasives really do wear away paint film thickness and leave hologram-like scratches, they also reduce the effective barrier left behind to protect your car. In contrast Auto-balm doesn’t produce a single speck of dust, its non-abrasive film is buffed easily by the cotton stockinette provided imparting the most reflective glossy protection

possible. Independent tests against leading and well-known brands confirm our own test results proving that Auto-balm is the most protective wax or polish for your car.

Free applicator and buffing cloth

Auto-balm is highly concentrated, it’s applied very sparingly using the supplied applicator pad, a little goes a long way, in fact one 300ml tub of Auto-balm will treat the average sized car up to 20 times.

Practical Classics agree...

“If your main criteria are sheen and paint protection, the ultra-durable wet-look shine Auto-balm achieves is unbeatable”
