

NanoMagic Shampoo

Nano protection shampoo

High-tech gloss shampoo with premium protection properties for washing vehicles by hand. Through the unique combination of innovative cleaning and sealing components a long-lasting dirt and water-repellent nano layer is formed (lotus effect). The treated surfaces are protected against aggressive environmental factors. After rinsing the water film breaks up immediately and thus supports the quick drying of the vehicle. NanoMagic Shampoo is particularly suitable for the care of vehicles sealed with 1K-Nano, because the sealing components it contains bond tightly with the 1K-Nano coating. This considerably increases the lifetime of the coating on regular use (every second or third vehicle wash). Other polishes or sealants that were previously applied are refreshed and not removed, as with traditional Autoshampos.

Areas of use

Cars, motor bikes, recreational and commercial vehicles, etc.

Recommendations for use

Hand washing: add 50 ml to 10 litres of water, clean the vehicle with a pad or a washing mitt and rinse off with water. To prevent limescale stains, use a cloth to wipe off the remaining water. Can also be applied with a foam cannon.
