CAR CARE COVERED

AIRFLOW[®] CAR CARE COVERED

Airflow UK is a long established company which has always specialised in innovative and practical car care products. Staffed entirely by classic car and motorcycle enthusiasts we concentrate on producing high quality products at affordable prices and in providing superb levels of customer service. You will find no call centre telephone answering at Airflow UK, just real people who are enthusiastic about our products and your vehicle.

We maintain close contacts with most car clubs and try to visit many shows and events around the UK, where we are always pleased

to meet old as well as prospective customers to explain our product range and answer your questions. Look out for the Airflow UK stand at the Classic Car Show at the NEC each year, and at many club and concours events.

As you will see from our catalogue we have a wide range of stylish and well made car care products which are always competitively priced. Our web site duplicates this brochure and can also be used to order our products which we always aim to despatch to you within 24 hours.

Call us today on: **0845 458 2611** or visit the Airflow website: **www.airflow-uk.com**

**IF YOU ARE DEDICATED TO YOUR CAR OR BIKE,
AIRFLOW HAS A PRODUCT FOR YOU...**

AIRCHAMBER®

No matter what you're storing - a car or computer, a motorbike or a Matisse - even temporary storage can result in permanent damage. Moisture rusts metal, plays havoc with electronics, and damp, stagnant conditions promote the growth of mildew and other moulds. Ultraviolet light then goes to work weakening rubber and fading coloured fabrics. And dust is more than just unsightly, being both awkward and potentially damaging to remove. A 'controlled environment' protects on all counts by creating precisely the right conditions needed to preserve your valuables.

COULD MOISTURE BE KILLING YOUR CAR?

Unless you store your vehicle in a controlled environment - it most certainly will be; because nothing poses a bigger threat for the cherished car owner than corrosion caused by hidden moisture and constant condensation. That's why serious car collectors use the Airchamber to prevent long term damage to their vehicles. Easy to erect, economical to run (typically around £20 per year) and simple to use - just drive in, zip up and switch on. Twin fans force up to 50,000 litres of clean, filtered air across every surface of your vehicle evaporating moisture and banishing condensation.

SIZES, DIMENSIONS & DETAILS

Size	Length	Width	Height	Application
XS	300cm	100cm	150cm	Motorbike, home storage
SPORTSCAR	415cm	180cm	170cm	MG, TR Porsche 356
S	450cm	200cm	180cm	Hatchback, small sports eg. Caterham Seven
M	520cm	200cm	180cm	Small saloon, coupe eg. Jaguar E-type
XM SPECIAL	500cm	220cm	180cm	Aston Martin, Ferrari
XM	520cm	220cm	180cm	Wide sports eg. Ferrari Testarossa
L	570cm	200cm	180cm	Saloon eg. Rolls Royce Phantom V, Aston Martin Lagonda
XL	570cm	220cm	180cm	Limousine, large saloon eg. Bentley Arnage
XXL	670cm	220cm	180cm	Cadillac, Buick, Pontiac

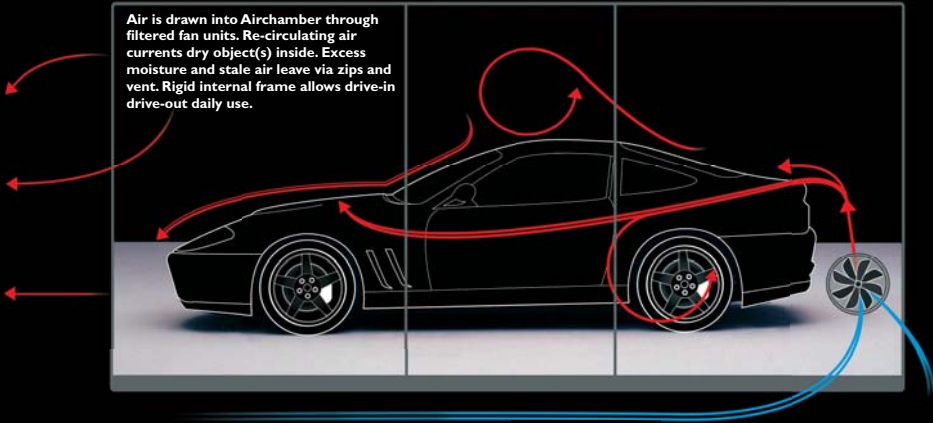

AIRCHAMBER®

- PREVENTS MILDEW, MOULD, RUST, DUST & MOISTURE
- FILTERS OUT HARMFUL UV LIGHT
- PROTECTS AGAINST MOST ACCIDENTAL CONTACT
- OFFERS A DEGREE OF PHYSICAL SECURITY
- KEEPS PETS AND CHILDREN AT BAY
- SUPER ECONOMICAL TO RUN - ALL YEAR ROUND
- UNIQUE RIGID 3D INNER FRAME
- MULTIPLE SIZES TO COVER MOST VEHICLES

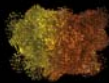

See table below...

THE AIR CHAMBER DIFFERENCE.

Air is drawn into Airchamber through filtered fan units. Re-circulating air currents dry object(s) inside. Excess moisture and stale air leave via zips and vent. Rigid internal frame allows drive-in drive-out daily use.

STOP THE ROT...

STOP RUST

STOP MILDEW

STOP DUST

STOP MOULDS

The Airchamber works by circulating up to 50,000 litres of clean air per hour throughout the storage cell, whilst electrostatic filters trap even the smallest airborne particles. In these conditions a rain soaked car is dried quickly – the breeze created by the air flow causing rapid evaporation just like on a washing line (it's like hanging your car out to dry). Evaporated moisture within the Airchamber is then allowed to escape with the airflow, exiting through the vents and closed zips. Replenished by fresh,

filtered air from the fans, the environment will always remain fresh, as well as condensation-free (because rapid changes in temperature are prevented). With a virtually moisture-free atmosphere, rust and mould simply cannot develop; the reason we don't say totally moisture-free is because even 'dry' air contains a certain, natural amount of (desired) water vapour. This helps prevent materials like wood, leather and rubber from losing their natural qualities.

OTHER POPULAR USES... STORAGE FOR:

ELECTRICAL GOODS

COMPUTER EQUIPMENT

ANTIQUES

GARDENING EQUIPMENT

HOUSEHOLD / GARDEN FURNITURE

ARCHIVES / RECORDS

CLOTHING

Whilst the controlled environment principle is not new, Airchamber's rigid, three-dimensional inner frame technology most certainly is. **No other system can boast this unique feature.** It means that you can drive your car straight into Airchamber, or use it as a walk-in store for household items. It also means that once you've erected your Airchamber (a simple procedure that takes around 45 minutes) instant storage is always at hand – wherever you need it, thanks to full portability.

EXTRA EXTRA LARGE	6.7 x 2.2 x 1.8m
EXTRA LARGE	5.7 x 2.2 x 1.8m
LARGE	5.7 x 2.0 x 1.8m
EXTRA MEDIUM	5.2 x 2.2 x 1.8m
EXTRA MEDIUM SPECIAL*	5.0 x 2.2 x 1.8m

* To accommodate standard UK garage sizes.

KING SIZE AIRCHAMBER®

SPECIFICATIONS:

Unique, rigid frame is designed for rapid assembly and is super lightweight - meaning the Airchamber is fully portable when erected.

Full height 'door panels' on both sides allow easy access to either car door.

High quality lightweight synthetic resin material is UV protective, anti-static, flame resistant and tested to temperatures as low as -25°C. The material eliminates rapid changes in air temperature, preventing the formation of condensation thus eliminating damp and mould.

The base sheet is a highly durable nylon-plastic weave which is fuel, oil and brake fluid repellent. This super durable material has been developed to allow users to carry out minor maintenance within the Airchamber.

Hi-tech static trap filtration system removes all abrasive particulate matter from the atmosphere ensuring your vehicle/items remain in pristine condition.

Specified with 12v brushless electric fan motors, for maximum longevity and efficiency. These powerful energy efficient fans process around 50,000 litres of clean air per hour, rapidly drying damp vehicles and preventing condensation and rust.

Swift circulation of fresh air turns any shed or barn into the perfect environment for storing any occasionally used items (great for electric or mechanical garden equipment).

Supplied complete with mains transformer and holdall.

Much less trouble than a bubble!

MEDIUM	5.2 x 2.0 x 1.8m
SMALL	4.5 x 2.0 x 1.8m
SPORTSCAR	4.15 x 1.8 x 1.7m

The regular Airchamber is made in 3 sizes perfect for hot hatches, track cars (i.e Caterham / Radical) and small saloons/coupes. It is a valuable addition to any enthusiasts garage.

Much less trouble than a bubble!

**PROVEN
TECHNOLOGY**
DEVELOPED OVER MANY YEARS IN THE
SUPERCAR AND CLASSIC CAR INDUSTRIES

ONE SIZE

3.0 x 1.0 x 1.5m

The motorcycle Airchamber is a 'must have' accessory for motorcyclists as bikes tend to be even more prone to moisture damage than cars, having lots of exposed surfaces and corrosion prone materials. More than that, this Chamber is perfect for neatly storing all your riding gear; helmets, leathers, gloves and boots can all be gently dried so that your kit is nice and fresh ready for your next ride!

AIRFLOW[®] ACCESSORIES

Essential car care products

3 - STEP BATTERY CHARGER

Flat batteries are the bane of classic car owners everywhere! Airflow's NEW 3-step chargers put an end to all that and now come in 6, 12 and 24 volt systems.

The chargers operate in three distinct stages:

1. A fast charge to quickly bring a flat battery up to 80% efficiency.
2. A 2hr timer mode that tops the battery up to a full level of charge.
3. A safe float trickle charge is then maintained.

SPECIFICATIONS

- Charge current unaffected by fluctuations in mains voltage
- Three colour LED indicates stage of charge cycle
- Crocodile clip connection harness as standard
- Fully protected against reverse polarity
- Battery can be left on charge for extended periods
- Super compact at just: 10cm x 5cm x 6cm, 250g

PERFORMANCE

Version	Max Output Current (W)	Current Limit (A)	Timer Mode (V)	Float Mode (V)
6v	24	2.7	7.35	6.9
12v	40	2.7	14.7	13.8
24v	45	1.5	27.6	27.6

You've heard about it... but what does it do?

Quite simply the Airflow Conditioner puts an end to the kind of battery problems classic enthusiasts and owners of temperamental car and bike exotica will be only too familiar with. It will charge a battery from a minimum of 9 volts to 13.8 volts and then turn off. It will then monitor battery voltage until it drops to 12 volts, through natural drain, and then turn on again to re-charge and exercise the battery to 13.8 volts. This not only prolongs the life of your battery, but ensures the battery is ready for action when you are.

THE AIRFLOW BATTERY CONDITIONER

SPECIFICATIONS:

- The only battery conditioner to turn on and off automatically
- Constantly exercises battery cells for extended life
- LED battery status display
- Suitable for all types of 12V battery, 5AH to 100AH max. Including Gel, Lead Acid and Sealed
- Polarity warning display
- Thermal cut out facility
- Can be used without disconnecting any vehicle electrics
- No danger of overcharging batteries
- Designed to be left connected for long periods
- Functional window mounting bracket
- 5cm x 6cm x 10cm, 600g

Supplied with a crocodile clip harness for direct connection, and a fused wiring harness for secure connection to hidden batteries, ideal for motorcycles.

Optional harness available for cigar plug connection.

THIS DEVICE IS SIMPLY A STROKE OF GENIUS - SINCE USING IT I HAVE HAD NO PROBLEMS STARTING MY FERRARI - IT'S ALWAYS READY TO GO WHEN I AM. A SIMPLE BUT VERY EFFECTIVE SOLUTION FOR MINIMAL INVESTMENT...

Geraint Thomas, Tunbridge Wells

PORTABLE POWER PACKS

The Portable Power Station can be used as an engine jump-starter, battery charger or portable power source.

PS800

Two 12v power outlet sockets and two emergency work lights.

PS800

PS800i

All the features of the PS800 (except the work lights), PLUS a built in 230v AC 80w inverter, that can provide 80w max of power for up to 2hrs.

PS800i

PS800a

In addition to the features of the PS800, the PS800a comes equipped with a built in air compressor and pressure gauge, which is perfect for inflating car/bicycle tyres and footballs etc. The unit also has three 12v power sockets.

PS800a

SPECIFICATIONS

- Stylish high quality design with a rugged plastic case and accessory storage compartment
- Sealed and maintenance free 12V 18Ah lead-acid battery
- LED display showing battery condition and charge level
- Jump start 600 Amps peak/250 Amps constant current output
- Integral heavy duty jump leads
- Supplied with domestic mains adaptor and vehicle charging lead
- Overnight recharge with the mains adaptor
- Quick charge vehicle plug to plug lead
- CE approved
- 279mm(h) x 318mm(w) x 134mm(d)
- Weight 8.5 kg (PS800a 10Kg)

WHEEL NUT GUN

At last - a user friendly method of changing wheels. How many times have you had to wait for roadside assistance because you have been unable to undo the wheel nuts?

Car manufacturers assume everyone is capable of using an inadequate sized wheel brace, after the garage has so thoroughly tightened the wheel nuts that only professional tools will undo them again. And even if you are strong enough to shift them; why work up a sweat when there is an affordable, simple solution - The Airflow 12v Wheel Nut Gun.

Supplied in a neat hard plastic case, with four 1/2 inch drive sockets ranging from 14mm - 21mm, it will undo virtually any wheel nut no matter how tight it is, up to an incredible 200ft pounds of torque. Supplied with 4 metres of power cable to reach all 4 corners of your vehicle utilising the cigar lighter socket as a power source. The Airflow Wheel Nut Gun may be used in many other applications from Motorsport to DIY maintenance.

“ I ALWAYS DREAD GETTING A PUNCTURE IN THE DARK, THE WHEEL NUTS ARE SO HARD TO REMOVE AND CHIVALRY ISN'T WHAT IT USED TO BE! NOW EVEN I CAN CHANGE MY WHEEL QUICKLY - AND WITH THE MINIMUM OF FUSS. THANK YOU AIRFLOW ”

Sally Pickering, Hull

SPECIFICATIONS

- Powerful 12Volt motor
- 1/2 inch drive sockets from 14 - 21mm
- 4 metres of power cable
- Hard plastic carry case included
- Up to 200 foot pounds of torque available
- Driven from a car cigar lighter
- Easy switch reverse drive
- Optional crocodile clip harness available

CHROME NUMBER PLATE SURROUND

This simple, luxury trim kit puts the ultimate finishing touch to your cherished vehicle. The chrome number plate surround is manufactured from chrome plated brass which reduces the risk of rust or discolouration.

Ideal for either classics or modern cars, the chrome number plate surround has a slotted design which provides hidden fixings, utilising the original plate mounting holes, it is suitable for perspex or pressed aluminium plates and comes in one size to fit any standard UK plate.

KANGAROO SAFETY JUMP LEADS

The Kangaroo Safety Jump Leads are ingeniously designed to eliminate all those nasty and sometimes dangerous sparks that inevitably result when batteries are joined together. Simply connect the insulated grips of both separate sections to each individual battery before joining the two leads together!

SPECIFICATIONS

- Safer and easier to use, an affordable alternative to traditional jump leads
- Each lead has an LED light that glows when both positive and negative clips are properly attached
- Supplied in a neat zip pouch for easy storage when not in use
- Safe and simple ideal for novice car owners

ULTIMATE DRIP TRAY

SPECIFICATIONS

- Galvanised rust proof steel
- 1cm rolled wire 'soft' edge for safety
- Catches small components and fluids
- 119.4cm x 59.0cm

The Airflow Ultimate Drip Tray is unique - it's the only drip tray of its kind capable of protecting the floor under the engine and gearbox of most vehicles. This prevents unsightly permanent stains or slippery and dangerous 'puddles' of oil or any other engine fluids.

In addition the Airflow Ultimate Drip Tray is *perfect* for catching all those vital and illusive small parts that are inevitably dropped and always seem to blend into the background so effectively (for example when doing ratio changes at a race circuit it is ideal for catching

bearings and springs etc. without them becoming contaminated with dirt and grime).

The Airflow Ultimate Drip Tray is made of galvanised steel with a 1cm high rolled wire edge which eliminates any sharp edges. It is also completely rust-proof, so it will never look unsightly when placed under even the most exotic machinery.

Its shape and size makes it easy to slide between the front or rear wheels of a vehicle, and the rolled edge ensures it remains flat at all times.

AIRFLOW[®] SHELTERS

Create your perfect sheltered space

SWIFT SHADE

The SWIFT SHADE instant marquee is small enough to be portable, quick and easy to erect and is a very practical rainproof shelter with many uses. The durable steel or aluminium frames are interconnecting and everything is neatly stored away in a canvas bag. The whole structure takes literally minutes to erect and is ready in a moments notice.

- Motorsport shelter
- Camping trips
- Picnics and days out
- Beach shelter
- Garden parties
- Barbecues

SPECIFICATIONS

- 300g Polyester RAINPROOF Top
- Zip together sides (panels, windows or doors)
- Available finished in Blue or Green
- Choose either Steel or Alloy frame construction
- Sizes available : 3 x 3m Alloy or Steel
2.5 x 5m Steel only

AIRFLOW SHELTERS ARE VERY WELL MADE AND HAVE MANY USES, I USE MINE AT TRACK DAYS, CAMPING AND WHEN I HAVE GUESTS OVER FOR GARDEN PARTIES.

James Parker, West Bridgeford

SPECIFICATIONS

- Roof material manufactured from sturdy heavy duty nylon
- Lightweight nylon sides incorporate PVC windows
- Anchor plates and guy ropes supplied for ultra secure fixing
- Available in White
- Size: 3 x 6m (10ft x 20ft)

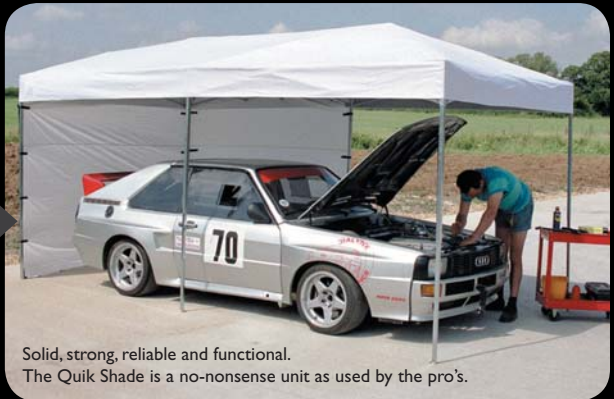

LUXURY MARQUEE

Manufactured in strong steel tube, this sturdy shelter is perfect for temporary storage or garden parties. Detachable ends give added versatility allowing taller vehicles access. And the window details at the sides not only allow light into the marquee, but also provide an attractive exterior appearance so that the shelter blends into its surroundings when left erected for longer periods of time. At 3m x 6m (10' x 20') the shelter is large enough to protect cars, small caravans and boats from the damage caused by the weather.

PROFESSIONAL HEAVY DUTY 'QUIK SHADE'

SPECIFICATIONS

- As used by professional motorsport teams
- Heavy Duty 500g Polyester fully waterproof canopy
- Zip together Sides (panel door)
- Size: 2.5 x 5m (8ft x 16ft)
- Steel frame construction
- Strong 1/4 inch box section legs
- Available in White (as shown)

Solid, strong, reliable and functional. The Quik Shade is a no-nonsense unit as used by the pro's.
