

**Product Description**

The high performance polish in a class of its own. Powerfully removes scratches, sanding and wear marks at top speed. Innovative polishing technology from the Menzerna laboratory ensures maximum removal with excellent gloss at the same time. The polish takes paint repair to a new level, restores the shine to heavily used clear coats and creates a noble deep shine.

**Recommended Usage**

1.	Clean surface thoroughly.
2.	Shake bottle and apply 3 (ø95 mm) - 7 (ø180 mm) pea-sized drops of polish to the polishing pad or lambskin, depending on pad size.
3.	Use either a rotary or eccentric polishing machine and use the cross-coating method.
4.	While polishing, apply strong, even pressure and run the product out at a consistent low speed.
5.	At first, the polish will seem a little milky and should be worked in until only a slightly transparent/oily film is visible.
6.	After polishing, remove polish residues with the premium microfiber cloth.
7.	Depending on the demands of the surface, a second stage may be performed to achieve a high-gloss surface. Here, you have the option of reapplying the Menzerna Cut Force Pro or a Menzerna Finish. In both cases in combination with the Menzerna Soft Cut Foam Pad.

**Menzerna Polishing Program**
